Vice President and Senior Economist

February 9, 2024

The views expressed are my own and do not necessarily reflect official positions of the Federal Reserve System.

Overview

- Economic activity and job growth slowing but still robust
 - Texas employment up 3.1 percent last year, above nation
 - Labor force grew at its fastest pace in decades
 - Domestic migration resilient, international migration increasing
- Return to trend growth likely in 2024
 - Some momentum still present at year end 2023
 - Near term risks to the outlook are mixed
 - But medium to long run factors still favor the region

Summary

- Economy had a surprisingly strong year
 - Forecast indicates Texas ‘landing’ at trend growth in 2024
- Downside risks to the outlook
 - Inflation resurgence
 - Consumer resilience may be ebbing; CRE still fragile
 - Geopolitical risk, election uncertainty on the rise
- Upside risks include financial conditions easing, migration remaining unusually high and forecast being wrong
 - Also uncertain when medium to long run factors that favor the region will play out, including nearshoring and industrial policy
