

Global Economic Forum

This two-day event provides secondary educators the opportunity to participate in a forum on the complex and interdependent global economy.

This conference is a perennial favorite and will feature insights from Dallas Fed economists and guests speakers about international topics. Sessions will provide opportunities for participants to deepen their understanding of the global economy and learn how to take conference content back to the classroom. One of the forum's highlights is videoconference collaboration among the Federal Reserve Banks of Boston, Cleveland and Dallas. This year the videoconference will feature the address from Fed Chairman Ben Bernanke to educators across the nation. See page 8.

Praise from Past Participants

“As always, your programs are the best I attend all year and one of the reasons I give up my days in the summer!! Thank you!!”

“This gets me all excited to teach econ—which is saying something after 19 years in the field.”

“The conference materials update curriculum materials with the latest data and perspectives. Materials can be easily integrated into my curriculum.”
