COVID-19 Tests Per Case in Major Advanced Economies

NOTES: Data last updated June 22, 2021. COVID-19 tests per case is equal to the 7-day moving average of the number of tests divided by the number of cases per day.

SOURCE: Our World in Data (OWID).
Indicators of Real Activity
NOTE: The advanced economies (ex. U.S.) aggregate includes the Euro Area, Japan, the U.K., Canada, Australia, South Korea, Switzerland and Sweden. The emerging economies aggregate includes China, Brazil, Russia, India, Mexico, Indonesia, Turkey, Argentina, South Africa and Colombia. The world aggregate includes these countries, which make up approximately 80 percent of world GDP computed using purchasing power parity (PPP)-adjusted GDP weights.
Chart 2. OECD Industrial Production

Index, 2005 = 100

Last Observation: Mar = 112.6

NOTE: Countries included in the industrial production index are all members of the Organization for Economic Cooperation and Development, or OECD (Australia, Austria, Belgium, Canada, Chile, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, South Korea, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, United Kingdom and United States).

SOURCES: OECD; Haver Analytics
Chart 3. Global Purchasing Managers Index

Index

2017 2018 2019 2020 2021

NOTE: This index measures purchasing managers' perspectives of current business conditions. An index value greater than 50 indicates economic expansion from the previous month, while a value below 50 indicates contraction.
Chart 4. Unemployment in Major Advanced Economies

NOTE: The chart plots harmonized unemployment data for the U.K.
Chart 5. Unemployment in OECD Economies

Last Observation: Apr = 6.7

SOURCES: OECD; Haver Analytics

Globalization Institute
Federal Reserve Bank of Dallas
NOTE: This series includes data from 23 industrialized and 60 emerging market economies and covers approximately 97 percent of total world trade. Trade volume is calculated as the arithmetic average of world export volumes and world import volumes.
Chart 7. Volume of World Merchandise Trade

Imports

Exports

Index, 2000 = 100

NOTE: Import and export series include data from 23 industrialized and 60 emerging market economies and cover approximately 97 percent of total world trade.

Monetary Policy
NOTES: The chart plots the federal funds rate for the U.S., the main refinancing operation rate for the Euro Area, the base rate for the U.K., the overnight target rate for Canada and the uncollateralized overnight call rate for Japan applied until April 3, 2013, before the main operating policy target changed to expanding the monetary base. On February 16, 2016, the Bank of Japan (BoJ) adopted negative interest rates applied to excess reserves that financial institutions hold at the BoJ. The Bank also introduced an interest rate target of around 0 percent for its 10-year government bond yields in September 2016.
NOTE: The Reserve Bank of India utilizes the repo rate to inject liquidity into the monetary system and the reverse repo rate to remove liquidity. On August 19, 2016, the Bank of Indonesia changed its policy rate from the BI rate to the 7-day reverse repo rate.
