What's New: Headcounts level off in July

- Texas employment declined 0.1% in July. June's employment growth was revised down to 3.3%
 - U.S. employment decreased by 0.2% in July
- The Dallas Fed's Texas Employment Forecast indicates jobs will increase by 1.7% in 2026
- Texas unemployment ticked up to 4.5% in July
 - U.S. unemployment was 4.1% in July
- July Texas Business Outlook Surveys (TBOS) indicate gains and challenges in firms' hiring processes.
 - Half of firms are currently trying to hire.
 - Most firms report impediments to hiring, such as applicant shortages, applicants looking for more pay than offered, and lack of hard skills in hiring pools.
 - Worker retention has improved over the past three months, but fewer firms are reporting improvements in retention compared to the start of the year.

Outlook

Rate of business formation picked up in Q4 2025

Business applications per business establishments

NOTES: Data are quarterly through Q4 2025. Business applications data are missing for the first week of January 2021.
SOURCE: U.S. Census Bureau.

The Texas employment forecast indicates 1.7% growth in 2026 (range 1.3%-2.1%)

NOTE: The Dallas Fed Texas Employment Forecast is based on the average of four models. Three models are VARs where Texas payroll employment is regressed on WTI oil prices, the US leading index and the Texas leading index, respectively. The fourth model is a regression of payroll employment on lags of payroll employment, expectations for U.S. GDP growth, WTI oil prices, and four COVID-19 dummy variables (March-June 2020).
